My Research Non-Funded Agreements (MRNF)

What’s new with My Research?

My Research Applications (MRA) is an online tool within the My Research portal for researchers to secure the institutional endorsement and approval of their research applications. To date, only funded research proposals have been administered via the My Research portal. The functionality of My Research is being expanded to include non-funded research agreements, including:

- Non-Disclosure Agreement (NDA)
- Data Transfer Agreement (DTA)
- Material Transfer Agreement (MTA)
- Research Memorandum of Understanding (MOU)
- Research Equipment Loan Agreement
- Visiting Scientist IP Agreement

Why?

- Improve and update the services provided by the VPRI to the UT research community
- Increase efficiency and consistency
- Allow researchers to link agreements to certification and compliance requirements
- Improve transparency of research agreements to the relevant department and division
- Modernize the approval and submission process for non-funded research agreements

The journey to implementation...

- User testing & training spring 2019
- System development late winter 2018 / early winter 2019
- First round demonstrations and feedback winter 2019
- System launch July 2019
